

Elite Multiplank

Hygienic Wall Lining & Partitioning

Multiplank PVC panels provide a tough, durable and hygienic wall partitioning system that offers a versatile solution in a variety of environments. Lightweight construction and a unique click system facilitate quick and simple installation. A calcium stabilised top layer ensures a colourfast finish that is highly resistant to chemicals and disinfectants. Multiplank panels are increasingly being used for the construction of walls in hygienic areas.

Proven Quality - The panels and profiles are manufactured from impact resistant hard PVC. This makes the smooth Elite Multiplank panels suited for many wall applications.

As part of the Beplas Green initiative, Elite Multiplank is manufactured from recycled PVC. It is reusable where partitioning is temporary and is 100% recyclable.

MATERIAL	PVC
SIZES	3000mm x 300mm 4000mm x 300mm
THICKNESS	35mm
COLOUR	White or Grey

Characteristics:

- Easy to clean
- Smooth, hygienic surface
- Impact resistant
- Excellent chemical resistance
- Simple and quick assembly
- Flexible, removable system
- Complete with range of fixings
- Long life guarantee

*Due to the nature of the manufacturing process, there may be some colour drift apparent
